

Cell phone usage aboard an aircraft is a terrible idea.
IT is disturbing to other passengers and will create problems for flight crew.
It will enable terrorists to better co-ordinate their tasks. IT will create an
even more stressful environment in the cabin. People will be distracted in the
event of an emergency/
evacuation. Sitting next to someone on a phone talking constantly when you are
trying to rest is a huge disturbance. Please allow us one place where the
obnoxious use of cell phones will be prohibited. We have been unable to use
them so far and it is fine
so why change it.
